

# Glider

## A smooth operating space-saver

If your gliders don't "glide" any more or you have a space where a swinging sash would be in the way, The *Infinity*® Glider is the perfect solution.

These durable, energy-efficient windows operate smoothly and seal tightly against air and water infiltration. Made with tough, dependable Ultrex® fiberglass inside and out, our gliders are virtually maintenance-free.

You'll also appreciate the superior performance and long-term energy cost savings provided by standard Low E II with argon insulating glass.

Cleaning the glass is simple with tilt latches that allow you to remove the operable sash for easy access.

## Available in many operations

Choose left operating or right operating sash.

Triple sash units are available with operating sash on both ends.
